

BIOETHICS, HUMANITIES AND MEDICINE (BHM)

Interdisciplinary Minor

The interdisciplinary minor in Bioethics, Humanities and Medicine is designed to foster students' understanding of the ethical dimensions of science, health research and health care delivery; to provide students with the knowledge and skills necessary to engage and analyze these dimensions; to facilitate students' integration of their education in the humanities and their understanding of, and approach to, medicine and health care; and to allow students to bring this interdisciplinary knowledge to bear in medical education and practice.
