PSYCHOLOGY (PSY)

The psychology department's goal is to provide majors with broad exposure to basic areas of psychology, along with an in-depth understanding of the methods by which psychological research is conducted. Regardless of whether your ultimate career goal is to become an applied psychologist (e.g., clinical psychologist, counselor, social worker, or consultant), to conduct behavioral research, to become a college professor, or to enter another profession altogether (e.g., law, business, medicine), a psychology major can be useful. This is because it provides in-depth knowledge about human thought, emotion, and behavior, which is

- relevant to any career; and
- through learning how psychologists research human thought, emotion, and behavior;
- students develop intellectual skills that allow them to generate and evaluate knowledge in many areas, including but not limited to psychology.

Thus, the Wake Forest psychology department aims to provide a rigorous and stimulating undergraduate education in both content and methods of psychology. Our department, like most undergraduate liberal arts departments, emphasizes research over applied work and research is a central component of many courses. A research emphasis in an undergraduate program provides the best preparation for applied graduate work as well as a strong foundation for a wide array of jobs.

PSY 151 is a prerequisite to all courses of a higher number. Courses numbered below 151 do not count toward Division IV requirements or toward the major in psychology. PSY 310, PSY 311, PSY 312, or special permission of the instructor is prerequisite for some 300-level courses. See individual course descriptions for specific information. A minimum GPA of 2.0 or higher in psychology courses is required to graduate with a major or minor in psychology.

Programs
Major
- B.A. in Psychology

Minor
- Minor in Psychology

Courses
Psychology (PSY)

PSY 100. Learning to Learn. (3 h)
A course designed for first and second year students who wish to improve their academic performance through the application of learning, study, memory, and time management strategies. By permission of the instructor only. Pass/Fail only.

PSY 151. Introductory Psychology. (3 h)
A systematic survey of psychology as the scientific study of behavior. Prerequisite to all courses of a higher number. (D)

PSY 241. Developmental Psychology. (3 h)
Surveys physical, emotional, cognitive, and social development in humans from conception to death. P-PSY 151. (D)

PSY 243. Biopsychology. (3 h)
An introduction to the biological substrates and processes that govern behavior. P- PSY 151. (D)

PSY 245. Survey of Abnormal Behavior. (3 h)
Study of problem behaviors such as depression, alcoholism, antisocial personality, the schizophrenias, and pathogenic personality patterns, with emphasis on causes, prevention, and the relationships of these disorders to normal lifestyles. P-PSY 151. (D)

PSY 248. Cognitive Psychology. (3 h)
Surveys theory and research on cognitive processes. Emphasizes memory, attention, visual and auditory information processing, concept identification/formation, and language. P- PSY 151. (D)

PSY 255. Personality. (3 h)
Survey of theory and research on the structure and function of human personality, with attention to the relationship to cognition, emotion, motivation, and behavior. P-PSY 151. (D)

PSY 260. Social Psychology. (3 h)
A survey of the field, including theories of social behavior, interpersonal attraction, attitudes and attitude change, and group behavior. P-PSY 151. (D)

PSY 265. Human Sexuality. (3 h)
Explores the psychological and physiological aspects of human sexuality, with attention to sexual mores, sexual deviances, sexual dysfunction, and sex-related roles. P-PSY 151. (D)

PSY 268. Industrial/Organization Psychology. (3 h)
Psychological principles and methods applied to problems commonly encountered in business and industry. P-PSY 151. (D)

PSY 270. Topics in Psychology. (1.5 h)
Focused in-depth review of current theory and research on a selected topic in the field. P-PSY 151.

PSY 275. Internship in Psychology. (3 h)
Field work in pre-approved settings under the supervision of qualified professionals. Related readings and a term paper required. Students must apply and secure permission from designated Psychology Department faculty member who will assign final grade. Students desiring to propose internship that has not been pre-approved must do so at least 1 month before the proposed start of the internship, following standard department procedures. Internships will not be approved for credit after the internship has already begun. Credits cannot count toward minimum required for major or minor. Pass/Fail only. Open only to declared psychology majors or minors with a minimum GPA of 2.75. Maximum 3 hours. P-PSY 310 or 311 and Permission of the Department (POD).

PSY 278. Psychology of Memory. (3 h)
A study of specialized knowledge regarding the most relevant aspects of memory function and important investigative techniques in this field. (D)

PSY 280. Directed Study. (1-3 h)
Student research performed under faculty supervision. P-PSY 151 and approval of faculty member prior to registration.
PSY 310. Methods in Psychological Research. (3 h)
Introduces statistics and research design for students minoring in psychology. P—PSY 151 (D, QR)

PSY 311. Research Methods I. (4 h)
Design and statistical analysis of correlational research. Lab-twin each weekly. P—At least one course in addition to PSY 151. (QR, D)

PSY 312. Research Methods II. (4 h)
Design and statistical analysis of experimental methods. Lab-twin each weekly. P—PSY 311. (QR)

PSY 313. History and Systems of Psychology. (3 h)
The development of psychological thought and research from ancient Greece to the present. Normally offered only fall semester. Senior major standing only. P—Two psychology courses beyond PSY 151 or POI. (D)

PSY 314. Special Topics in Social Psychology. (3 h)
Theoretical and empirical examination of specialized areas within social psychology. May be repeated for credit if topic varies. P—PSY 151. (D)

PSY 315. Special Topics in Personality Psychology. (3 h)
Theoretical and empirical examination of specialized areas within personality psychology. May be repeated for credit if topic varies. P—PSY 151. (D)

PSY 316. Special Topics in Developmental Psychology. (3 h)
Theoretical and empirical examination of specialized areas within developmental psychology. May be repeated for credit if topic varies. P—PSY 151. (D)

PSY 317. Special Topics in Experimental Psychology. (3 h)
Theoretical and empirical examination of specialized areas within experimental psychology. May be repeated for credit if topic varies. P—PSY 151. (D)

PSY 320. Physiological Psychology. (3 h)
Provides an in-depth examination of the nervous system and the physiological processes that underlie sensation, motor control, thinking, and emotion. P—PSY 310 or 311 or POI.

PSY 322. Psychopharmacology. (3 h)
A survey of the influences of a wide range of psychoactive drugs, both legal and illegal, on human physiology, cognition, and behavior. P—PSY 151. (D)

PSY 323. Animal Behavior. (3 h)
A survey of laboratory and field research on animal behavior. P—PSY 310 or 311 or POI.

PSY 326. Learning Theory and Research. (3 h)
Theory and current research in learning, with emphasis on applications of learning principles for behavior modification and comparisons across species. P—PSY 310 or 311. P or C-PSY 312.

PSY 329. Perception. (3 h)
Survey of theory and research findings on various sensory systems (vision, hearing, touch, taste). P—310 or 311.

PSY 331. Research in Cognitive Psychology. (3 h)
In-depth examination of research in a selected area of cognitive psychology such as memory, attention, or executive function. Research projects required. P—PSY 310 or 311. P or C-PSY 312.

PSY 333. Motivation of Behavior. (3 h)
Surveys basic motivational concepts and related evidence. P—PSY 310 or 311. P or C-PSY 312.

PSY 338. Emotion. (3 h)
Survey of theory methods and research in the area of emotion. Developmental, cultural, social-psychological, physiological, personality, and clinical perspectives on emotions are given. P—PSY 310 or 311.

PSY 341. Research in Developmental Psychology. (3 h)
Methodological issues and selected research in developmental psychology. Research projects required. P—PSY 310 or 311. P or C—PSY 312.

PSY 344. Abnormal Psychology. (3 h)
Descriptive analysis of the major types of abnormal behavior with attention to organic, psychological, and cultural causes and major modes of therapy. Offered in the summer. P—PSY 151. (D)

PSY 346. Psychological Disorders of Childhood. (3 h)
Survey of problems including conduct disorders, attention deficits disorders, depression, and autism. Emphasis on causes, prevention, treatment, and the relationships of disorders to normal child development and family life. P—PSY 245 or 344 or POI. (D)

PSY 348. Clinical Neuroscience. (3 h)
An examination of the physiological processes and clinical abnormalities. This implies already having an understanding of normal brain function and anatomy. P—PSY 243 or PSY 320 or PSY 322.

PSY 351. Personality Research. (3 h)
The application of a variety of research procedures to the study of human personality. Research projects required. P—PSY 310 or 311.

PSY 355. Research in Social Psychology. (3 h)
Methodological issues and selected research in the study of human as a social animal. Research projects required. P—PSY 310 or 311.

PSY 357. Cross-Cultural Psychology. (3 h)
An examination of differences in psychological processes (e.g., attitudes, perception, mental health, organizational behavior) associated with cultural variation. P—PSY 151. (D)

PSY 359. Psychology of Gender. (3 h)
An exploration of the psychological similarities and differences between human males and females, including consideration of social, cognitive, motivational, biological, and developmental determinants of behavior. P—PSY 151. (D)

PSY 362. Psychological Testing. (3 h)
An overview of the development and nature of psychological tests with applications to school counseling, business, and clinical practice. Students have the opportunity to take a variety of psychological tests. P—PSY 310 or 311.

PSY 363. Survey of Clinical Psychology. (3 h)
Overview of the field of clinical psychology. P—Psychology senior majors only or POI. (D)

PSY 364. Stereotyping and Prejudice. (3 h)
Theoretical and empirical examination of the processes underlying prejudice, discrimination and racism. P—PSY 151. (D)

PSY 367. Parent-Child Relationships. (3 h)
Surveys characteristics of parent-child relationships and issues of parenting as related to a variety of factors, including developmental changes of parent and child, family structure, and sociocultural context. P—PSY 151. (D)

PSY 374. Research in Judgment and Decision Making. (3 h)
A theoretical and empirical examination of how people make decisions and judgments about their lives and the world, and how these processes can be improved. P—PSY 310 or 311.
PSY 381. Honors Seminar. (3 h)
Seminar on selected problems in psychology. Intended primarily for students in the departmental honors program. P-PSY 311 and POI.

PSY 383. Honors Research. (3 h)
Seminar in selected issues in research design, followed by independent empirical research under the supervision of a member of the departmental faculty. P-PSY 311 and POI.

PSY 392. Contemporary Issues in Psychology. (1.5 h)
Seminar treatment of current theory and research in several areas of psychology. Required for senior majors. P-PSY 311, P or C- PSY 312, and senior major standing.

Faculty

Chair Eric R. Stone

William L. Poteat Professor of Psychology Deborah L. Best

Professors Terry D. Blumenthal, Christy M. Buchanan, Dale Dagenbach, William W. Fleeson, R. Michael Furr, Catherine E. Seta, Eric R. Stone

Associate Professors Janine M. Jennings, Lara K. Kammrath, Lisa Kiang, John V. Petrocelli, Wayne E. Pratt, Christian E. Waugh

Assistant Professors Shannon T. Brady, Dunuwille Eranda R. Jayawickreme, E.J. Masicampo, Anthony W. Sali

Assistant Teaching Professors Heath L. Greene, Melissa M. Masicampo

Visiting Assistant Professors Tess N. Chevalier

Adjunct Professors Jay R. Kaplan, W. Jack Rejeski Jr.

Adjunct Associate Professor C. Drew Edwards

Adjunct Assistant Professors Phillip G. Batten, Ashley L. Heffner, Leigh D. Watson

Adjunct Instructor Stephen W. Davis
